

Soc Virnyl Estela

Backend Engineer | Technical Writer | Open Source Developer and Member @ [openSUSE](#) | Rust • Go • TypeScript • Javascript • Python (FastAPI) • AWS

✉ contact@uncomfyhalomacro.pl Ⓜ [github.com/uncomfyhalomacro](#) Ⓛ [codeberg.org/uncomfyhalomacro](#) Ⓞ [www.linkedin.com/in/socvirnylestela](#) Ⓟ [uncomfyhalomacro.pl](#)

Backend engineer with experience in Rust, Go, and AWS, building high-performance services and developer tooling. My background in technical writing and teaching strengthens my ability to design clear APIs, write maintainable systems, and produce high-quality documentation. Open-source contributor and maintainer with a strong focus on performance, automation, and CI/CD.

Technical Skills

Programming Languages: Rust, Go, Python, TypeScript, Bash

Backend & APIs: FastAPI, ExpressJS, Hono, NodeJS, Postgres, Sqlite, Redis

Web: React, Redux Toolkit, NextJS, Vite, wagmi, Node, Deno

DevOps & Tooling: Docker, AWS, GitHub Actions, CI/CD, Linux

Documentation and Writing Tools: Markdown, Typst

Professional and Work Experience

Software Developer (Git, GitHub, CI/CD, Python, Rust, Golang, AWS) Block Liquidity – 🌐 United Kingdom – Ⓟ [https://blockliquidity.xyz](#)

⌚ October 2025 - January 2026

- Built multiple services and modules to process **1000+ data streams per second** for a notification system using Rust ensuring that users receive accurate real-time notifications.
- Sped up slow SQL queries from minutes down to milliseconds** for a Postgres database by using native types and best practices when rewriting SQL ensuring data is loaded fast in the platform.
- Built an API in Postgres, Redis and Rust manage alerts, increasing and simplifying the overall process with **80% increase in response times due to faster data (de)serialisation** increasing speed, flexibility and maintainability.

Technical Content Developer (Git, GitHub, Rust, React, Deno, NodeJS, Hono, Solidity, Web3) TRIBE – 🌐 Singapore – Ⓟ [https://tribex.co](#)

⌚ Mar 2024 - June 2025

Boosted number of learners, from **300 to 1000+** on the [StackUp platform](#) through tutorials on key technologies (**React, Node.js, Rust, Deno**), and as a mentor and community member.

- [Rust Pathway](#): a series of **Rust** tutorials and campaigns
- [Fuel Up Your API Development with Hono and Deno](#): a introductory tutorial for backend development and authentication using **Hono** and **Deno**.
- [The Deno Learning Modules](#): A series of tutorials using **Deno** as the Javascript runtime for web development.
- [Learn authentication and authorisation with ExpressJS](#): a introductory tutorial for backend development using **Node.js** and **ExpressJS**.
- [StackUp Forums](#): a microblogging project using blockchain to store posts and comments with **Solidity, React, viem, wagmi, foundry**, and **TypeScript**.

Open Source Experience

Core Developer/Maintainer OBS Service Cargo – Ⓜ [https://github.com/openSUSE-Rust/obs-service-cargo](#)

⌚ 2022 - present

Automation tool for **Rust software packaging** written in **Rust** with **100% test coverage**.

- The **ONLY tool** for [https://build.opensuse.org](#) to **automate packaging** of **Rust** software in openSUSE.

Core Developer/Maintainer Roast – Ⓜ [https://github.com/openSUSE-Rust/roast](#)

⌚ 2024 - present

Archiving tool written in **Rust** using test-driven development. Supports **GZ, ZSTD, XZ** and **BZ** compression.

- Achieved **70% increase in performance**, shortening the time to create highly compressed archive tarballs.
- Has **100% test coverage** to ensure consistent behaviour such as **deterministic creation of tar archives to conform with Reproducible Builds**.
- Has **Git feature** allowing users to **create tarballs straight from a valid remote Git repository** for easier UX.

Organization Admin/Member Waycrate – Ⓟ [https://waycrate.github.io](#)

⌚ 2022 - present

A community of open-source enthusiasts and contributors.

- Became a Mentor Organization for Google Summer of Code:** [Google Summer of Code 2024](#) and [Google Summer of Code 2025](#)
- Inspired** new developers to **participate** and **contribute** to **open-source**.

Member and Volunteer 🐧 openSUSE – Ⓟ [https://opensuse.org](#)

⌚ 2021 - present

A **Linux community** of desktop users, developers and open-source contributors.

- Software Packager** of **100+ software packages** for the openSUSE project: [https://build.opensuse.org/users/uncomfyhalomacro](#).
- Software Developer** of openSUSE's Rust packaging tool for [openSUSE Build Service](#) called [OBS Service Cargo](#).

Core Developer/Maintainer Bunny – Ⓜ [https://github.com/uncomfyhalomacro/bunny](#)

⌚ July 2025

A **markdown parser library and static site generator** written in **Hare**, a systems programming language.

- Won 1st place** with [https://github.com/uncomfyhalomacro/bunny](#) in the amateur category of [Boot.dev 2025 Hackathon](#).

Education

Programmer/Software Developer (self-taught)

⌚ 2020 - present

- Completed** the fundamentals of **backend development** focusing on Golang and Typescript at [Boot.dev](#) as **professional development certification or course**. Progress and certificates at [Boot.dev](#): [https://www.boot.dev/u/uncomfyhalomacro](#).

- **Skills Learned:** Git, Golang, Data Structures and Algorithms, Python, DevOps, AWS, RabbitMQ, RAG, Linux, AI Agents, Kubernetes, CI/CD with Docker and GitHub Actions (and more at [https://www.boot.dev/u/uncomfyhalomacro](#))

BSc. in Biology (Microbiology) – Mindanao State University - Iligan Institute of Technology – 🌐 Philippines

⌚ [https://www.msuil.edu.ph](#)

⌚ 2018 - 2022

Academic Distinction: **Cum Laude GPA 1.593**
